Disertační práce

Název práce

Macroeconomic Effects of Quantitative Easing Policies: Were the Macroeconomic Goals Achieved?

Postup v přípravě disertační práce**Synopsis:**

Quantitative Easing (QE) is a tool of Expansionary Monetary Policy, which has been introduced to the literature in the last two decades. It has firstly started in Japan (2001), then after recent Global Financial Crisis in US (2008), UK (2009) and in EU (2009) with monthly purchases of government and private securities. The aims of QE policies are to decrease the interest rates, increase output and price level, and simultaneously decrease the unemployment rate, in other words, revive economic activity.

For that reason, I want to measure and analyze the targeted macroeconomic goals of QE policies, where to what extent the goals of QE policy achieved globally (Japan, US, UK and EU)? How QE interventions affected real economy (like: commodity prices, sectoral effects)? And how financial markets responded to the QE shocks? Could/Did it have persistent effect on macroeconomic elements?

As a measurement methodology for the impacts of the policy shocks, I will use the Global Vector Autoregressive (GVAR) approach (supportive by the relevant literature), which construct a model for both individual and joint interactions of structural shocks in economies. GVAR model will estimate how QE policy shocks affected countries individually and jointly that were implying this unconventional monetary policy instrument.

There are many country and region-specific empirical studies related to the macroeconomic effects of QE interventions. In my wide literature investigation, to the best of my knowledge, this research will be the first, which will encounter all QE policy maker countries together, and will assess the macroeconomic effectiveness of policy shocks.

Form and scope of the dissertation:

The dissertation will have between 100 to 200 standard pages

Time schedule of the progress of the dissertation:

1st year of study:

Work on the first dissertation article with an expected topics "Effects of Unconventional Monetary Policy shocks on Sectoral Commodity Prices" and "Impacts of Unconventional Monetary Policy on House Prices: EU, Japan, US and UK case studies"

2nd year of study:

Work on the second dissertation article with an expected topic "Impacts of Unconventional Monetary Policy on Sectoral Unemployment Rates"

3rd year of study:

Work on the third dissertation article with an expected topic "Effects of Quantitative Easing Shocks on Stock Prices: Sectoral Analyses"

4th year of study:

Finishing pre-defense and defense of dissertation

Roční komentář k postupu v přípravě disertační práce**Průběh studia**

Schedule date of the state doctoral examination: November 2020

Schedule date of the pre-defense: November 2021

Schedule date of the defense of the dissertation: May 2022

Shrnutí studenta	Compulsory duties are completed like, defense attendances, PhD seminars and 3 TAs (1 extra). I could publish IES WP and journal article in academic year 2019/20. The published journal article "Environmental consequences of tourism: do oil-exporting countries import more CO2 emissions?" was out my planned ISP (added it now). Moreover, the published WP is submitted to journal (with impact factor) and as conference paper. Shahriyar Aliyev	-
Návrh školitele	Shahriyar proceeds according to his ISP. First part of his dissertation is completed and he will proceed with a second paper. all other duties are fulfilled. ek	A
Rozhodnutí oborové rady	Approved by CDS.	A

Ve smyslu č. 10 odst. 8 Studijního a zkušebního řádu Univerzity Karlovy student plní individuální studijní plán.

Oborová rada navrhuje POKRAČOVÁNÍ studia.
